Our COMPETENCE:

Small compact water makers for extracting pure water from sea or brackish water.

As a result of the revolutionary Aquavendola technology on basis of reverse osmosis our units have extraordinary characteristics in energy consumption, reliability and permanent running, space requirement, weight and operation.

And even more water performance!

You have got the choice between the integrated compact-units (K) or the modular units (M) both available as complete ready-to install S-versions!

H2O-FACTORY develops and manufactures in Germany.

drin**KING**-unit made in Germany !

Wherever you are:
On the oceans of this world or ashore.
One can never have enough fresh drinking water.

We recommend: drin**KING** !
Units that are setting new standards!
